

GLOBALSOLUTIONS

Amended and Restated Software Development, Deployment, Data & Support Agreement

Project Sweet1ne - master commercial invoice, delivery terms and payment authority

Document reference	GS-SW1-2026-001-R2
Version / status	v4.0 - EXECUTION COPY
Project	Project Sweet1ne
Audience / parties	GlobalSolutions and Sweet1ne
Original project date	13 July 2026
Amendment / issue date	19 July 2026

Execution note: This document is part of the amended and restated Project Sweet1ne pack. Fields expressly marked as requiring completion must be completed before the relevant signature, publication or production access. The documents are operational legal drafts under the law of England and Wales and should receive final review by a suitably qualified UK solicitor and, where relevant, a data-protection professional.

TOTAL CONTRACT / COMMERCIAL INVOICE VALUE: GBP 2,500.00 Version 1: GBP 1,000.00. Version 2: GBP 1,500.00. This signed Agreement is the master commercial invoice and payment authority. Milestone payment notices may state verified payment details and exact due dates but do not replace or vary this Agreement.

Commercial and invoice particulars

FIELD	AGREED PARTICULAR
Invoice / agreement reference	GS-SW1-2026-001-R2
Original agreement / invoice date	13 July 2026
Amendment and restatement date	19 July 2026
Supplier	GlobalSolutions, Selwood Court, Churchill Close, Dartford, Kent, DA1 1QL, United Kingdom
Supplier contact	Louis Kisitu, Managing Director - info@globalsolutionsug.com
Client	Sweet1ne
Client contact	Tolulope Babalola, Co-Founder - tolub@post.com
Project locations	Sweet1ne Chingford and Lewisham
Programme	Version 1 Visual Menu Platform + Version 2 Centralised Intelligence, Website & Marketing System
Technical lead	Kelvin Kibiru - GlobalSolutions Lead Software Developer
Sub-developer	Steven Machera
Programme duration	18 weeks / 4.5 months, subject to dependencies and approved Change Requests
Governing law	England and Wales

1. Parties, appointment and delivery authority

- 1.1 This Agreement is between GlobalSolutions, trading from the Supplier address stated above ("GlobalSolutions"), and Sweet1ne, operating at Chingford and Lewisham through the legal entity or proprietor identified in the execution schedule ("Sweet1ne" or the "Client").
- 1.2 Sweet1ne appoints GlobalSolutions to design, develop, test, deploy and support the Project Sweet1ne platform in accordance with this Agreement and the Project Sweet1ne Phased Development Plan v1.2 dated July 2026 (the "Development Plan").
- 1.3 Kelvin Kibiru is GlobalSolutions' Lead Software Developer. He may develop project systems directly and source, assess and co-ordinate additional developers according to delivery needs. Steven Machera is the identified sub-developer currently assigned under Kelvin. Neither Kelvin nor Steven is a party to this Client Agreement, and Sweet1ne has no separate contractual or payment obligation to them.
- 1.4 GlobalSolutions remains responsible to Sweet1ne for contractual delivery by its personnel. Developer selection, allocation, supervision and internal remuneration remain matters for GlobalSolutions.
- 1.5 The parties are independent contractors. Nothing creates a partnership, agency, employment relationship or fiduciary duty between them.

2. Amendment, supersession and contractual documents

- 2.1 This Agreement amends and restates the earlier GS-SW1-2026-001 agreement/invoice. From the Amendment Date it supersedes that document for scope, price, payment, timeline, data protection, acceptance and support matters. Rights and liabilities accrued before the Amendment Date are preserved.
- 2.2 The contractual framework comprises: this Agreement and its schedules; the Development Plan v1.2; the amended Mutual NDA; the Data Processing Agreement; the International Transfer and Remote Access Schedule when activated; the developer undertakings; and any later written Change Request approved by authorised representatives.
- 2.3 If documents conflict, priority is: (a) a later signed Change Request; (b) the Data Processing Agreement for personal-data matters; (c) this Agreement and its payment schedule; (d) the Mutual NDA for confidentiality; (e) the Development Plan; and (f) operational registers. The stricter security or confidentiality obligation applies unless a later signed document expressly states otherwise.
- 2.4 Informal discussions, messages, demonstrations and meeting notes do not change price, scope, acceptance, ownership or deadlines unless incorporated into an approved Change Request or signed delivery register.

3. Services and programme scope

- 3.1** GlobalSolutions will deliver two releases over a target eighteen-week programme. Version 1 remains unchanged and is targeted for full two-branch deployment by Week 10. Version 2 is targeted for completion at Week 18.
- 3.2 Version 1 - Visual Menu Platform includes: mobile-first QR visual menu; branch-specific menus and QR codes; dish imagery, descriptions, prices, dietary and allergen tags; search and filtering; order building and submission; role-based staff dashboard; real-time menu control; and per-branch analytics for scans, views, searches and orders.**
- 3.3 Version 2 - Centralised Intelligence, Website & Marketing System includes: a new mobile-first Sweet1ne website; native embedding of the Version 1 menu; automatic lead capture through website and QR journeys; a central contact database with consent, source and branch tagging; branded bulk email marketing with editable templates and personalisation; campaign delivery and performance measurement; integration of menu/QR, website, Google Analytics, Meta and email data; the Collect -> Analyse -> Critique -> Alert -> Act recommendation layer; calibrated thresholds; and a weekly insight brief.**
- 3.4** The new website and QR menu will operate as a connected system so agreed menu content is maintained once and reflected through the relevant customer channels, subject to the final architecture and approved third-party integrations.
- 3.5** During Phase 6 the parties will approve a Delivery Definition Register fixing the website site map, page templates, content responsibilities, booking or enquiry integration, starter email-template set, tracking events, lead fields, campaign controls and acceptance evidence. Work beyond the approved register is a Change Request.
- 3.6** Excluded unless added in writing: card or in-app payment processing; POS or delivery-platform integration; loyalty schemes and complex promotions; augmented-reality previews; multi-language support; paid media management; ongoing campaign operation; ongoing copywriting or photography; 24-hour support; infrastructure management; and third-party subscription or usage charges.

4. Milestones, invoice schedule and acceptance

#	PAYMENT / ACCEPTANCE EVENT	WHEN DUE	AMOUNT
1	Initial deposit - authority to commence Version 1	On signature / before Week 1	GBP 500
2	Version 1 feature-complete, tested and ready for pilot deployment	At Week 6 acceptance	GBP 500
-	Three-week live pilot in one branch; V2 discovery and preparation in parallel	Weeks 7-9	No payment
3	Deposit before the main Version 2 build continues, including website, lead capture, intelligence and email marketing	Week 10	GBP 1,000
4	Version 2 complete, production go-live and agreed handover ready	Immediately at Week 18 acceptance	GBP 500

- 4.1** A milestone is accepted when its material deliverables satisfy the applicable exit criteria in this Agreement, the Development Plan and the approved Delivery Definition Register.
- 4.2** Sweet1ne will review each submitted milestone within five Business Days. A rejection must be written, itemised and identify a material failure against an agreed acceptance criterion. GlobalSolutions will address valid material failures and resubmit.
- 4.3** If no compliant rejection is received within five Business Days, the milestone is deemed accepted. Minor defects that do not prevent operational use do not delay acceptance and will be addressed in testing or the post-launch support period.
- 4.4** Sweet1ne will nominate one authorised project decision-maker. Stakeholder feedback must be consolidated through that person unless the parties agree otherwise in writing.
- 4.5** Pilot success targets are measurement objectives, not guaranteed commercial outcomes. A decision to proceed after the pilot may take account of data quality, operational adoption and owner experience, not a single metric in isolation.

5. Client dependencies and delay

- Week 1: pilot branch; 10-15 starter dishes; approved prices, descriptions, dietary and allergen information; professional photography; baseline sales data; and a named menu owner.
- By Week 8: Google Analytics and Meta access; Sweet1ne domain and DNS access; brand assets; approved website content; examples of desired email standards; and a working session to approve metrics, checks and thresholds.
- Before live lead capture: approved privacy notice, cookie/tracking notice, marketing wording, retention choices and named privacy contact.
- Before production deployment: approved staff roles, sender-domain configuration, booking attribution method, third-party subscriptions and provider terms.

- For each review gate: consolidated feedback and approval from the authorised decision-maker within the agreed review period.
- 5.1** Client-caused delay extends the programme by at least the period of delay and may require re-sequencing. GlobalSolutions is not responsible for inaccurate or unlawful Client content, missing permissions, unavailable third-party accounts or late approvals.
- 5.2** GlobalSolutions will notify Sweet1ne promptly of a material development blocker within its control and provide a reasonable recovery proposal.

6. Revisions and change control

- 6.1** The fixed price includes up to three consolidated design-related revision rounds within the agreed scope. Each round must be one prioritised list submitted by the authorised Sweet1ne representative.
- 6.2** A revision adjusts an approved design or implementation. A new page type, integration, role, workflow, data model, platform, provider, campaign service or functionality is not a revision and requires a Change Request.
- 6.3** A Change Request must record the changed deliverables, fee, payment trigger, dependencies and timing effect. GlobalSolutions is not required to commence changed work until approval and any required deposit are received.

7. Deployment, launch and support

- 7.1** GlobalSolutions will support deployment to the agreed production environment, including release preparation, reasonable environment configuration, launch checks, domain/DNS implementation assistance and handover guidance.
- 7.2** Ongoing server administration, infrastructure monitoring, backups, domain renewal, third-party account administration and 24-hour operational cover are excluded unless separately contracted.
- 7.3** GlobalSolutions will provide sixty calendar days of post-launch support from final production go-live. Included support covers reproducible defects, material delivered-functionality errors, deployment issues attributable to the delivered code and reasonable technical clarification.
- 7.4** Support excludes new features, redesign, ongoing content entry, campaign operation, provider outages, API changes, unauthorised modifications, misuse, unsupported environments and issues caused by Client data or instructions. Work after day sixty requires a support plan or Change Request.

8. Fees, invoice status and payment

- 8.1** The fixed programme fee is GBP 2,500.00, subject only to approved Change Requests and third-party charges expressly accepted by Sweet1ne. Version 1 is GBP 1,000.00 and Version 2 is GBP 1,500.00.
- 8.2** This executed Agreement is the master commercial invoice and payment authority. It contains the unique invoice reference, supplier contact and address, Client details, service description, invoice date, amounts and total. GlobalSolutions may issue milestone payment notices and receipts for administration and reconciliation.
- 8.3** The initial deposit is due on signature. Later instalments are due within three Business Days of milestone acceptance or deemed acceptance. GlobalSolutions may suspend work, deployment, access or handover while an undisputed amount is overdue; the resulting delay does not place GlobalSolutions in breach.
- 8.4** VAT will be charged only where legally applicable and supported by valid VAT registration and invoice particulars. The execution schedule must be completed accurately before issue as a tax invoice.
- 8.5** Where legally applicable, GlobalSolutions may claim statutory late-payment interest and recovery costs on overdue commercial debts.

9. Bank transfer and stablecoin payment

- 9.1** Sweet1ne may pay by bank transfer, USDT, USDC or another stablecoin expressly approved in writing by GlobalSolutions. All contractual amounts remain denominated in pounds sterling.
- 9.2** For stablecoin payment, GlobalSolutions will issue a verified milestone notice stating the token, blockchain network, wallet address, GBP/USD pricing source, quoted token amount and quote expiry. Sweet1ne must verify any new or changed details directly with the authorised GlobalSolutions representative.
- 9.3** Sweet1ne must send the exact approved token on the exact approved network. Payment to an incorrect address, network or token contract remains Sweet1ne's responsibility until GlobalSolutions receives and can lawfully control the funds.
- 9.4** Stablecoin payment is received after required confirmations and internal verification. Sweet1ne will provide the transaction hash and payer identity. Sweet1ne bears bank, exchange, intermediary, gas and network charges so GlobalSolutions receives the full GBP-equivalent amount.

10. Intellectual property, source code and handover

- 10.1** Until all due amounts are paid, deliverables, source code, configuration, documentation and access remain owned or controlled by GlobalSolutions and are licensed only for approved testing and pilot use.
- 10.2** After full payment, GlobalSolutions will hand over project-specific source code, database access or agreed export, administrator and deployment credentials under its control, and reasonable technical documentation identified in the handover register.
- 10.3** Project-specific deliverables created exclusively for Sweet1ne are assigned to Sweet1ne on full payment, subject to third-party licences and GlobalSolutions Background Materials. Background Materials include pre-existing code, reusable components, frameworks, methods, templates and know-how. GlobalSolutions retains those materials and grants Sweet1ne a perpetual, non-exclusive, royalty-free licence to use them as embedded in the platform.
- 10.4** Open-source and third-party components remain subject to their licences. GlobalSolutions does not transfer ownership of third-party software, provider accounts, APIs, fonts, photographs or content it does not own.
- 10.5** Sweet1ne owns its business data, menus, photographs, branding and supplied content and warrants that it has rights and permissions to provide and use them.

11. Confidentiality, data protection and security

- 11.1** The amended Mutual NDA governs confidential information. The Data Processing Agreement governs personal data and is incorporated into this Agreement.
- 11.2** Sweet1ne is Controller and determines the purposes and lawful use of customer personal data. GlobalSolutions acts as Processor when it handles that data to build, host, support or operate the system on Sweet1ne's instructions. Consulting on campaign, analytics or system use does not by itself make GlobalSolutions a joint controller; Sweet1ne retains final decision-making authority.
- 11.3** No live customer personal data may be made available to Kelvin, Steven or another developer until the DPA is signed, the relevant undertaking is executed, least-privilege access is approved and any required international-transfer safeguard is in place.
- 11.4** Sweet1ne is responsible for approving and publishing customer-facing privacy information, marketing permissions, cookie choices, retention decisions and campaign purposes. GlobalSolutions will implement the approved technical controls and provide reasonable compliance information.
- 11.5** Neither party will place confidential data, credentials or proprietary code in public or unapproved AI tools. Approved development tools must be used with minimum necessary content, appropriate privacy settings, human review and licence/security checks.

12. Marketing, analytics and recommendations

- 12.1** Sweet1ne decides the marketing purpose, audience, lawful route and campaign content. GlobalSolutions may provide technical or operational recommendations but will not send a campaign outside Sweet1ne's documented approval.
- 12.2** Email opens, clicks, menu events and attributed bookings are measurement indicators. Tracking and attribution depend on provider capabilities, consent choices, browser settings and third-party systems and are not guaranteed to be complete.
- 12.3** The intelligence engine provides decision support, not autonomous legal, financial, health or similarly significant decisions. Sweet1ne remains responsible for reviewing and acting on recommendations.

13. Quality, warranties and responsibilities

- 13.1** GlobalSolutions will perform the Services with reasonable skill and care and will use reasonable secure-development and testing practices.
- 13.2** To its knowledge, project-specific code created by GlobalSolutions will not intentionally include malicious code or knowingly infringe third-party intellectual property. GlobalSolutions does not warrant third-party services or uninterrupted software operation.
- 13.3** Sweet1ne remains responsible for menu accuracy, allergens, prices, marketing claims, offer terms, staff decisions, regulatory obligations and business outcomes.

14. Suspension and termination

- 14.1** Either party may terminate for material breach not remedied within ten Business Days after written notice, or immediately for fraud, unlawful conduct, serious confidentiality or security breach, insolvency or deliberate system misuse.

- 14.2** Sweet1ne may terminate for convenience on ten Business Days' written notice. Applied deposits are non-refundable and Sweet1ne must pay for completed work, work in progress, committed third-party costs and reasonable demobilisation up to termination.
- 14.3** On termination, GlobalSolutions will provide paid-for completed deliverables in their then-current state. Ownership and source-code transfer remain conditional upon full payment. Personal data will be returned or deleted as required by the DPA.

15. Delivery-team non-circumvention

- 15.1** During the programme and for twelve months afterwards, Sweet1ne will not knowingly bypass GlobalSolutions to engage Kelvin, Steven or another developer introduced specifically for this programme to perform substantially similar project work, unless GlobalSolutions gives written consent. This does not prohibit untargeted general recruitment or an independently pre-existing relationship disclosed in writing.

16. Liability

- 16.1** Neither party is liable for indirect or consequential loss, loss of anticipated profit or opportunity, or loss caused by third-party platform failure, except where liability cannot lawfully be excluded.
- 16.2** GlobalSolutions' aggregate contractual liability is limited to fees actually paid under this Agreement, except for fraud, deliberate misconduct, death or personal injury caused by negligence, or liability that cannot legally be limited. This clause does not limit either party's statutory regulatory responsibility under data-protection law.
- 16.3** No particular revenue increase, scan rate, conversion rate, sender reputation, list growth or meeting-time reduction is guaranteed.

17. General

- 17.1** Notices may be sent by email to the authorised representatives. A notice changing bank or wallet details is effective only after direct verification.
- 17.2** Neither party may assign this Agreement without consent, except GlobalSolutions may assign to a successor to its business and may use approved subcontractors while remaining responsible for delivery.
- 17.3** If a provision is unenforceable, it will be adjusted only to the minimum extent necessary. Delay in enforcing a right is not a waiver.
- 17.4** This Agreement may be signed electronically and in counterparts. It and any non-contractual obligations are governed by the law of England and Wales, and the courts of England and Wales have exclusive jurisdiction.

Schedule A - Commercial invoice and payment record

INVOICE FIELD	DETAIL
Invoice number	GS-SW1-2026-001-R2
Invoice date	19 July 2026
Supplier	GlobalSolutions, Flat 8, Selwood Court, Churchill Close, Dartford, Kent, DA1 1QL, United Kingdom
Supplier contact	info@globalsolutionsug.com Louis Kisitu, Managing Director
Customer	Sweet1ne
Supply / programme period	Target Weeks 1-18 from commencement
Description	Design, development, deployment, pilot, website, lead capture, email marketing, intelligence calibration and go-live of Project Sweet1ne V1 and V2
Subtotal	GBP 2,500.00
VAT	GBP 0.00 unless a valid VAT invoice is issued following confirmation of VAT status
Total	GBP 2,500.00
Payment terms	Milestone-based: GBP 500 / GBP 500 / GBP 1,000 / GBP 500
Payment methods	Verified bank transfer or approved stablecoin payment notice

Schedule B - Delivery Definition Register

ITEM TO FIX IN PHASE 6	REQUIRED RECORD / ACCEPTANCE EVIDENCE
Website structure	Approved site map, page-template list, mobile design and content owner.
Menu embedding	One-source content workflow and verified website/QR rendering.
Lead fields	Approved minimum fields, consent wording, source/branch tags and validation.
Booking / enquiry	Provider or form flow, attribution method, notifications and failure handling.
Email templates	Starter-template number and types, editable elements, test recipients and approval evidence.
Campaign system	Audience selection, personalisation, unsubscribe, suppression and reporting.
Analytics events	Approved event dictionary across menu, website, email and bookings.
Roles and access	Floor Staff, Branch Admin, Main Admin and technical support permissions.
Handover	Repositories, deployment guide, database/export, admin credentials and provider register.

Schedule C - Payment instruction and receipt control

Payment instructions will be issued by verified milestone notice. The notice must identify the invoice reference, milestone, GBP amount, due date, payment route and authorised sender. Stablecoin notices must also identify token, network, wallet, pricing source, token amount and expiry. Sweet1ne must not rely on unverified change-of-details messages.

MILESTONE	GBP AMOUNT	NOTICE DATE	METHOD / REFERENCE	RECEIPT STATUS
1 - V1 commencement	500			
2 - V1 ready for pilot	500			
3 - V2 main build continues	1,000			
4 - V2 completion	500			

Signature and acceptance

Each signatory confirms that they are authorised to bind the named organisation or individual, and that they have read and accepted this document and its schedules.
